

Treatments - Composites

23/10/2024 2:33 pm BST

Summary

Composite Treatments are a means of selling several items/services automatically when a trigger or 'Parent' item is dispensed in the add treatment screen.

This is a useful way to sell 'Bundles'/'Packages'

Composite Treatments are configured in Code Entry

Details

Dispense a Composite Item

1. Navigate to the '**Add Treatment**' Screen (Treatment > Add Treatment tab).
2. Search for and select a composite item (Using the same method documented on the [Adding a Treatment](#) page).

Note: Composite Treatments can be easily identified because they show in bold.

3. Once selected, a window will appear. The window shows the initial parent item at the top, followed by a panel underneath displaying a list of child items contained within the composite.

Composite Item - Spay Bitch

Total For this Treatment Item: 146.82 29.36 176.18

- Select the items you wish to dispense using the checkboxes on the left-hand column and select the '**Process**' button to proceed.

The system will process all items on the window, adding them to the patient's treatment draft. If labels, quantities or batch numbers are required, prompts will appear and you will be instructed to enter any required information.

Once an item has been added a tick will be added to the progress window on the left hand side of the screen. This may just be quantity required or a label.
